

indoor

all natural FEED SCHEDULE

aggressive rate: Feed every watering.

normal rate: Use 2 times a week flushing with pure water in between feedings.
Use lower feed rate for sativa varieties. Use high rate for indica varieties.

Each product gives freedom to manipulate variables; root growth, growth speed, growth habit, stack time, swell size, crystal formation & specialized immunities.

*usage rates per gallon of water

*clean measuring cup between measuring each product.

	transplant	growth	transition	transition	bloom	bloom	bloom	bloom	bloom	bloom	bloom
			WEEK 1	WEEK 2	WEEK 3	WEEK 4	WEEK 5	WEEK 6	WEEK 7	WEEK 8	WEEK 9
grow up natural (root enhancer/reverse auto flower)	2ml	1ml									
grow out natural 12-0-0 (greenage/no extension)	2ml	2ml	3ml	3ml	3ml	3ml	3ml	3ml	3ml	3ml	3ml
bloom stack (flower stacker)	1ml	1ml	5ml	5ml	3ml	3ml	3ml				
bloom swell natural 0-11-0 (swell starter)			1ml	1ml	3ml	3ml	3ml	5ml	5ml	5ml	5ml
cal girth (nutrient accelerator)	2ml	3ml	3ml	3ml	3ml	3ml	3ml	3ml	3ml	3ml	3ml
mag sweet (soil charge and brix builder)	2ml	5ml	5ml	5ml	5ml	5ml	5ml	10ml	15ml	15ml	15ml
bloom hard 0-21-0 cal 12% (swell and harden)							7ml	10ml	15ml	10ml	10ml
bamboo silica 70% silica (swell booster)		1ml	1ml	1ml	2ml	2ml	2ml	5ml	2ml	2ml	2ml

CONVERSIONS: 1 tsp = 5mL, 1Tbsp = 15mL, 1 Cup = 240 mL, 1oz = 29.5 mL, 12oz = 355 mL, 36oz = 1064 mL, 1qt = 964mL, 1L = 1000 mL, 1Gal = 3785 mL

FOLIAR											
isoop (30ml as miticide)	15ml	15ml	15ml	15ml							
bloom stack (every other day during transition)			30ml	30ml							

Natural Fertilizers

It is evident in nature, that "natural" does not necessarily mean pure. "All natural" is a term widely used to define a product made from all natural ingredients. To achieve true meaning of "All Natural", one must extract both human and natural impurities from nature's resources.

Through colloidal restructuring of nature's compounds, we are able to pull out and discard heavy metals, toxic residues, and molecular imperfections. AG420 encourages purity as a staple in all our products.

For more information on our products, install techniques and strain specific feeding schedules visit us at www.ag420products.com
