## FERTILIZER FEED SCHEDULE

aggressive rate: Feed every watering.

normal rate: Use 2 times a week flushing with pure water in between feedings.

Use lower feed rate for sativa varieties. Use high rate for indica varieties.

Each product gives freedom to manipulate variables; root growth, growth speed, growth habit, stack time, swell size, crystal formation & specialized immunities.

\*usage rates per gallon of water

\*clean measuring cup between measuring each product.
